

Claims

- [c1] A cosmetic stick composition comprising, by weight of the total composition:
0.5–30% of a stick structuring agent which is a solid or semi-solid at room temperature and has a melting point of 34 to 38 ° C.
10–90% of a nonvolatile oil which is selected from the group consisting triisostearyl citrate, trioctyldodecyl citrate, and mixtures thereof;
1–30% of a wax comprising a fatty alcohol, and
0.1–25% of particulate matter having a particle size of 0.5 to 200 microns.
- [c2] The composition of claim 1 wherein the stick structuring agent is an oleophilic organic compound.
- [c3] The composition of claim 2 wherein the stick structuring agent further comprises hydrophilic groups.
- [c4] The composition of claim 1 wherein the stick structuring agent comprises lanolin.
- [c5] The composition of claim 1 wherein the stick structuring agent is non-crystalline organic compound having moderate to extensive branching in its chemical structure.
- [c6] The composition of claim 1 wherein the stick structuring agent is a sterol or sterol ester.
- [c7]

The composition of claim 1 wherein the sterol has the formula:

wherein A is methyl or an aliphatic side chain.

[c8] The composition of claim 1 wherein the stick structuring agent is a sterol that contains hydroxyl groups esterified with one or more fatty acids.

[c9] The composition of claim 8 wherein the fatty acids are branched chain fatty acids.

[c10] The composition of claim 1 wherein the stick structuring agent comprises a sterol esterified with branched chain fatty acids.

[c11] The composition of claim 1 wherein the stick structuring agent comprises C10-30 cholesterol/lanasterol esters.

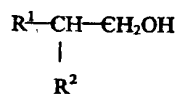

[c12] The composition of claim 1 wherein the fatty alcohol comprises cetyl alcohol.

[c13] The composition of claim 1 further comprising cyclomethicone

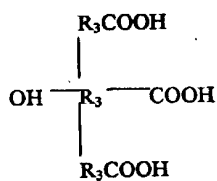

[c14] The composition of claim 1 further comprising polyethylene wax.

[c15]

A cosmetic stick composition comprising, by weight of the total composition: 0.5–30% of a stick structuring agent which is a solid or semi-solid at room temperature and has a melting point of 34 to 38 °C. 10–90% of a nonvolatile oil which is the reaction product of a guérbet alcohol of the formula:

with a carboxylic acid having the general formula:

wherein R¹ and R² are each independently a C_{4–20} alkyl and each R³ is a C_{1–50} straight or branched chain alkyl.

1–30% of a wax comprising a fatty alcohol, and
0.1–25% of particulate matter having a particle size of 0.5 to 200 microns.

[c16] The composition of claim 15 wherein R₁ is methyl and the carboxylic acid is citric acid.

[c17] The composition of claim 16 wherein the guerbet alcohol is octyldodecyl alcohol, isostearyl alcohol.

[c18] The composition of claim 17 wherein the wax comprises cetyl alcohol.

[c19] The composition of claim 16 further comprising acrylates copolymer.

[c20] A lipstick composition comprising, by weight of the total composition:
0.5–30% of a stick structuring agent which is a solid or semi-solid at room temperature and has a melting point of 34 to 38 °C.
10–90% of a non-volatile oil comprising triisostearyl citrate,
1–30% of a wax comprising a fatty alcohol,
0.1–25% of particulate matter having a particle size of 0.5 to 200 microns.
